HealthWyse Recognized with Laureate Award by Computerworld Honors Program

Reading, MA - May 15, 2006 – HealthWyse LLC has been recognized as a Laureate by the Computerworld Honors Program. Each year, a group of 100 Chairmen/CEOs of global technology companies, nominates individuals and organizations around the world whose visionary application of technology promotes positive social and economic progress. HealthWyse has been selected by an independent board of CIO-level judges.

“HealthWyse is extremely proud to receive this recognition and become a part of history.” said Michael Kramer, CEO. “This award is testimony to our innovative business model, and the proven results that our customers have attained in the Home Care, Hospice, and Private Duty markets.” The HealthWyse case study will be archived in over 100 leading research libraries around the world including the Smithsonian, Oxford, Harvard, MIT and Stanford.

Each year, members of the Chairmen’s Committee identify the organizations whose use of information technology has been especially noteworthy for the originality of its conception, the breadth of its vision and the significance of its benefit to society. The judges for the Medicine category represent Blue Cross/Blue Shield of Massachusetts, Baptist Health System, Rockford Health System, Cardinal Health and Computerworld. Previous winners in this category include Brigham and Women’s Hospital, Bristol-Myers Squibb, Medtronic and Pfizer.

“Each year, the Computerworld Honors Program seeks to recognize organizations, from a variety of sectors, for their ongoing efforts to utilize technology in order to benefit society,” said Bob Carrigan, Chairman of the Computerworld Honors Program Chairmen’s Committee and President of IDG Communications. “We are proud to provide a platform to publicly acknowledge these contributions.”

About HealthWyse

HealthWyse is a Massachusetts based company in its eighth year of providing information services to the Home Care, Hospice, and Private Duty markets. The company has developed an integrated clinical and financial application addressing the needs of this growing market. HealthWyse was the first vendor to incorporate a home care clinical record on a Pocket PC. Its unique products and services make the HealthWyse solution a viable option for agencies of all sizes.
