

**HealthWyse**  
*Take Care By the Hand*

FOR IMMEDIATE RELEASE  
Wilmington, MA  
August 20, 2007

### **HealthWyse Joins Hospice Leaders Project**

HealthWyse LLC, a leading provider of point of care Hospice solutions, has joined the OCS Hospice Leaders Project. This voluntary program expedites the adoption of meaningful performance comparisons in the hospice market and will enable HealthWyse's many Hospice customers to participate in the program.

HealthWyse provides an integrated clinical and financial information system to Hospices that helps them to focus on providing high quality care while managing the complex regulations affecting their business. Hospice providers have tools to easily document integrated case conferences, streamline billing to all payors and manage their complete businesses, while clinicians and other providers have a complete clinical record at point of care.

HealthWyse Hospice users can automatically collect and transmit the information required by the project. The OCS Hospice Leaders Project is a key part of the multiple efforts to formalize quality measurement, leveraging the vast experience of thousands of hospices and participating organizations.

"With the addition of HealthWyse to The Hospice Leaders Project, all members' ability to provide standardized data information, collection and reporting to hospice agencies is enhanced, strengthening both the individual and joint impact of all of these diverse programs" stated Martha Tecca, OCS' Senior Director of Hospice.

"Our Hospice customers will benefit from our participation in this consortium. HealthWyse is committed to providing better tools for measuring and managing both the quality of the clinical care processes, and the business performance for our Hospice clients" stated Michael R. Kramer, Ph.D, HealthWyse's CEO.

### **About HealthWyse, LLC**

HealthWyse is a leading provider of clinical and financial information services to the Hospice, Home Care, and Private Duty markets. The company offers a point of care clinical record along with a comprehensive integrated clinical and financial application that addresses the needs of the growing Hospice market.
