

HealthWyse LLC and Weatherbee Resources announce a strategic working relationship for the hospice market

Reading, MA. April 21, 2006 HealthWyse is pleased to announce a strategic working relationship with Weatherbee Resources, Inc., a trusted consulting firm that specializes in regulatory compliance for the hospice market. “By teaming with a recognized leader in the hospice industry, HealthWyse will tailor its software for current and anticipated challenges in the regulatory environment,” states Michael Kramer, PhD, President and CEO.

Heather Wilson, Ph.D., the President and founder of Weatherbee Resources, Inc. states: “We are delighted to work with an innovative software company that is committed to providing a software solution specifically designed to help hospice clients maintain compliance with both hospice and HIPAA regulations, while at the same time streamlining daily operations.”

As part of this relationship, Weatherbee Resources, Inc. is working with HealthWyse leadership and engineers to ensure that their hospice software solution is an integrated and robust clinical and financial system, tailored to meet the unique needs of hospice programs. As the HealthWyse solution is implemented in hospice programs around the country, Weatherbee’s services—including pre- and post-implementation assessment, baseline compliance audits, and other related consultation—will be offered to enhance the success of the transition to an electronic medical record.

The HealthWyse software solution is easy-to-use and available on PDAs, Laptops, and Tablets. This hosted solution is designed to minimize the risks associated with operating Information Systems, and to comply with HIPAA disaster recovery requirements. The integrated billing software supports electronic billing to Medicare and other 3rd party payors. The software performs automated quality checks before claims are processed, thus streamlining your billing process and improving cash flow.

About HealthWyse
