

Tallahassee Memorial Healthcare selects HealthWyse LLC for its Home Health Care Business

Reading, MASS. - May 17, 2004 - Serving the Florida state capitol district, Tallahassee Memorial Healthcare conducted an extensive evaluation of software vendors and selected HealthWyse for an integrated clinical and financial software application. The software will put the electronic medical record into the hands of the clinicians to care for the home health patient.

Clinicians will access and record patient information using a Microsoft CE Pocket PC. The solution will provide real efficiencies, and provide the clinician with the information needed to better care for their patients. Information will flow seamlessly from the clinician to the agency for improved patient care, and for the efficient billing of third-party payors.

"The HealthWyse system was selected because it is intuitive and user friendly. I believe it will revolutionize the way we do business. The system is designed to catch problems as you encounter them, not retrospectively" says Sherry Edewaard, R.N., the Administrator of the Home HealthCare/Life Services.

"The HealthWyse solution was conceived for clinical ease of use in the home care setting. The entire solution was designed for the current Medicare Prospective Payment System" says Michael Kramer Ph.D., President and CEO. "We have developed our solution offering with the express goal of making sure that our customers are successful. We look forward to our partnership with Tallahassee Memorial Home Care."

HealthWyse is a Massachusetts based company in its seventh year of providing information services to the Home Health and Hospice Community. The company has developed a comprehensive, lower cost solution addressing the needs of the growing home care market. Its unique products and services make the HealthWyse solution a viable option for agencies of all sizes.
